

GASKETED PLATE HEAT EXCHANGERS

Our extensive range of Gasketed Plate Heat Exchangers provide compact, thermally efficient solutions for your heat transfer requirements.

The main advantage of a Gasket Plate Heat Exchanger is that it is possible to open up the unit and inspect the inside components for cleaning and maintenance purposes. It also allows extra plates to be added should your process conditions change.

Advantages

- Compact design
- High thermal efficiency
- Cleanable and servicable
- Easy to install
- UK factory
- Fast delivery
- Low hold up volume
- Hygienic options

Applications

- Boiler separation
- Heat pumps
- Industrial process
- HVAC
- Brewing
