Insulation Jackets for Brazed & Gasketed Plate Heat Exchangers

All our Brazed & Gasketed Plate Heat Exchangers can be supplied with Insulation Jackets to reduce energy loss or protect against freezing.

The jackets are flexible and secured with Velcro fasteners so can be installed in less than 5 minutes and can easily be removed to allow access to the heat exchanger for servicing.

Jackets can be retro-fitted onto existing heat exchangers. Please advise model number and serial number.

Specification

Jacket & Liner Cloth
- Silicone coated glass fabric coated on one side with a water resistant flexible coating.
- Colour — Grey

Insulation
- 25 Rockwool RW3 25 mm BCO covered

Fastenings
- Fire retardant Velcro.

Maximum Operating Temperature
- 220°C

Thermal Conductivity
- 0.044 W/mK

Non flammable conforming to BS 476
