

UK EXCHANGERS LTD

the heat transfer specialists

Shell & Coil Heat Exchangers

Our range of Shell & Coil Heat Exchangers are very cost effective solutions for higher temperature and pressure applications particularly heating water using steam.

The heat exchanger consists of a coil of tubes inside a shell. This arrangement means that the tubes are free to expand and contract without the need for expansion bellows in the shell.

Standard Design Parameters

Design Temperature 203°C

Design Pressure 16 bar

Higher design pressures and temperatures can be catered for on request.

Main Features

- All stainless steel construction
- Compact design
- Complies to PED 97/23/EC
- Many sizes available from stock

Other Products from UK Exchangers Ltd

We offer a comprehensive range of heat exchangers designed to meet a wide range of applications:

- Air to Air Plate Heat Exchangers
- Thermal Wheels
- Finned Tube Coils
- Brazed Plate Heat Exchangers
- Gasketed Plate Heat Exchangers
- Water to Water Packaged Systems
- Steam to Water Packaged Systems
- All Welded Plate Heat Exchangers
- Heat Transfer Panels
- Fans
