

Air Heating & Cooling

We have developed specific ranges of Water to Air Heaters & Coolers for the following applications:

Commercial Air Heaters

- 10 to 100 kW outputs
- Compact Design
- Low cost
- Easy Installation
- Available from stock
- Fast delivery
- Wall brackets / hanging points
- Speed controls available

Industrial Air Heaters

- 40 to 350kW outputs
- Industrial strength Coils
- IP65 rated fans
- External mounting OK
- Larger kW duties on request
- Fast delivery
- Various material options
- Speed controls available

Industrial Drying Packages

- Standard range 100 to 1200kW hot air outputs
- Can be supplied as a skid mounted package, individual components without a skid base or fully containerised (100 to 500 kW units)
- Easy to install, high efficiency, turnkey solution
- Very popular in the woodchip and crop drying industries
- UK manufacture, stock units available as well as built to order
- Inverter drives and automatic control panels available as options

Heat Dumps & Air Blast Coolers

- Process water cooling
- Solar panel heat dumps
- CHP heat dumps
- IP 65 rated fans as standard
- UK manufacture
- Speed controls available
- High Efficiency Heat Exchanger
- ATEX rated fans available

Poultry Shed Heaters

- 30 to 60kW Outputs
- Wide fin spacing to allow for dust in the air
- IP65 rated fans, with outlet nozzles for long air throws
- Removable fan doors for easy cleaning and maintenance
