

Gasket Plate Heat Exchangers

Our extensive range of Gasket Plate Heat Exchangers provide compact, thermally efficient solutions to your heat transfer requirements.

The main advantage of a gasket plate heat exchanger is that it is possible to open up the unit and inspect the inside components for cleaning and maintenance purposes. It also allows extra plates to be added should your process conditions change.

Advantages

- Compact Design
- High Thermal Efficiency
- Cleanable and Servicable
- Easy to install
- UK Factory
- Fast delivery
- Low hold up volume
- Hygienic

Applications

- Boiler separation
- Heat Pumps
- Industrial Process
- HVAC
- Brewing
- Food & Dairy
- Pharmaceutical
- Many more...

Materials

- Plates: 304/316 Stainless Steel / Titanium / Hastelloy
- Gaskets: Nitrile / EPDM / Viton
- Connections: BSP threaded / Flanged / Hygienic
- Frames: Painted Steel / Stainless Steel

Parts & Accessories

- Insulation Jackets
- Drain Pans
- Flanged connections
- Maintenance tools
- UK Stock
- Fast delivery
- Supply or Fit
- Service & Overhaul
